### **Covalent Metrology moves operations to a new, larger facility**

April 3<sup>rd</sup>, 2018 Sunnyvale, CA – Covalent Metrology announced today that it has moved from its facility in Santa Clara to a larger facility located in Sunnyvale, CA. The new facility, which at nearly 6,000 square is twice as large as the previous space, is located in the heart of Silicon Valley and very close to a number of strategic customers.

The additional space will allow Covalent to accommodate additional imaging and characterization instruments to be added in the coming months. The space also provides room for the additional team members Covalent is hiring to support its expanded customer base. In the last year, Covalent has added Spectral Ellispometry, UV-Vis Spectrophotometry and XRD/XRR to its core techniques with additional announcements expected soon. The Company has more than doubled revenues in the past six months.

Founder and CEO Craig Hunter commented, “this is another step towards Covalent Metrology becoming the go-to player for CTOs, Team Leaders and Process Engineers looking to improve their metrology capabilities and to get better and faster service. This new facility allows us to expand our product offerings, grow our team and better serve our customers. Ultimately, we aim to build genuine partnerships with our customers and become the trusted one-stop-shop for metrology and characterization needs and expertise.”

Covalent’s new location is centrally positioned near Highway 101 just off the Lawrence Expressway, at a very convenient location for customers on the Peninsula or in the East Bay wishing to be present during measurement sessions. The central location also facilitates the ultra-fast turnaround times required by so many customers.

New location:

**Covalent Metrology Services Inc.  
921 Thompson Place  
Sunnyvale, CA 94085**

### ***About Covalent Metrology***

Covalent Metrology is a new venture dedicated to improving advanced materials R&D through innovation in the metrology services business model. Covalent works with clients to elevate their metrology capabilities, resulting in better data generated in less time and at lower cost. Covalent's Analytical Services unit currently offers high quality services including Atomic Force Microscopy (AFM), XRD/XRR, Spectral Ellipsometry among others, at a lower cost and with shorter turnaround time than competing labs. Covalent's Metrology Partners unit offers a suite of services based on client-specific development objectives aimed at improving in-house and external metrology quality, speed and cost. Headquarters are located in the heart of Silicon Valley.
